

Holland's NEW OLD FAITHFUL

Versatile
enough to
handle most
any crop.

Available with Cat I,
Cat II, 3-pt hitch or
toolbar hitch.

MODEL
1525

The Old Faithful is so versatile it handles most any plant you want to plant.

Holland's Old Faithful is just that. A transplanter with all the basic features. It will plant anything you can hold in your hand. Bulbs, plants, cuttings, seedlings, plugs, pots, seeds, potted cutting, tree stock, nursery stock and grape rooting, to name a few. It can handle large or small nursery stock from gallon containers to items as small as acorns.

Plant from 1" to 14" deep.

The opening shoe can create a 6", 10" or 14" deep furrow with widths of 2", 4" or 7" wide. The rear open end design allows the diversity of transplanting bulbs (beneath the surface) to stock over 6 feet tall, and everything in between.

The open end design allows a large variety of stock that can be planted with Holland's Old Faithful.

Adjustable packing wheels.

They are adjustable forward, or backward, as well as up or down. Additionally, the distance between the wheels can be adjusted. This allows you to adjust and control the amount of soil that will flow around the plant BEFORE the packing wheels do their job. Soil conditions as well as the type crop being planted dictate packing wheel settings. Packing wheels have grease fittings to add extra life.
