

# BELLTEC® AUGER SOLUTIONS

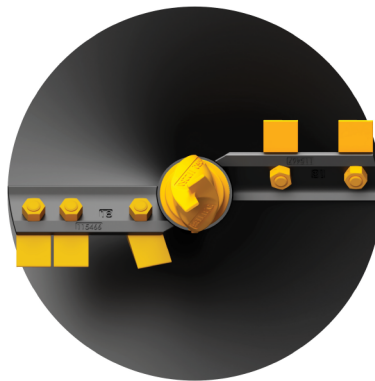

## EXCEPTIONAL QUALITY, EARTH-SHATTERING PERFORMANCE

You can trust Belltec augers to tackle harsh drilling conditions. Each Belltec auger is standard built with first-rate components like an A500 structural steel stem\*, top-to-bottom heavy-duty flighting, and a robust boring head and pilot cast from premium alloy steel. Plus, Belltec augers feature our patented AugerGuard™ Coupler that toughens the weak point in typical auger designs. After all, your auger should defeat hard ground, not the other way around.

### DCA-SERIES

DCA-Series Augers are a cost-effective solution for drilling in displaceable soils like sand, silt, or clay. DCA augers feature a hardened cast boring head made to withstand the demands of repeated use.

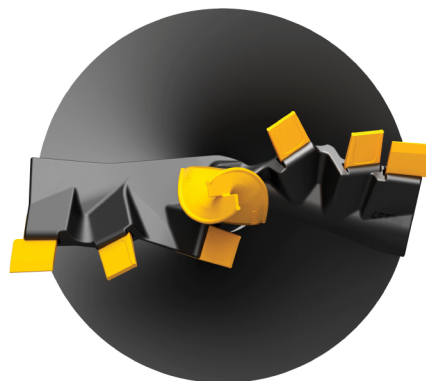

- Bolt-on tooth design for a secure fit
- Options from 4.5-in to 36-in overall diameter
- Available in 48-in or 54-in overall lengths
- Available in semi-double or double flight
- Custom auger solutions are available

### SDA-SERIES

SDA-Series Augers are reliable, all-around tools for routine drilling in displaceable soils and fractured rock. The improved boring head design and hefty 4.5-inch diameter pilot offer enhanced long-term performance and durability.

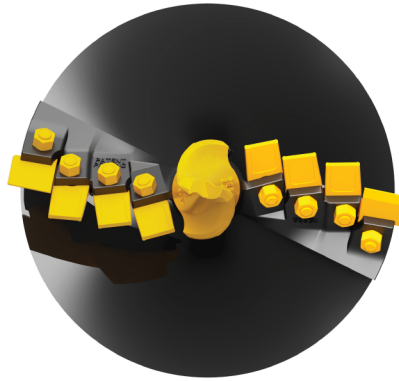

- Drive-in tooth design for quick servicing
- Options from 4.5-in to 36-in in overall diameter
- Available in 48-in or 54-in overall lengths
- Available in single or double flight
- Custom auger solutions are available

## BHD-SERIES

BHD-Series Augers free you to focus on the big picture, not the obstacles. The 4.75-in pilot and patented, severe-duty boring head minimizes hang-ups in the hardest displaceable soils by powering through gravel, cobble, or fractured rock.

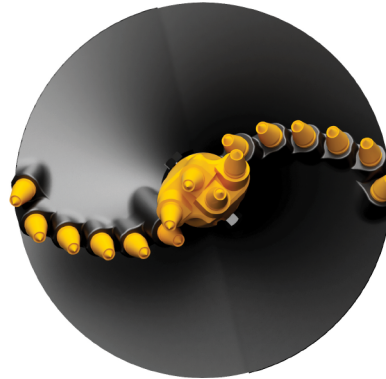

- Bolt-on tooth design for a secure fit
- Options from 4.5-in to 48-in overall diameter
- Available in 48-in or 54-in overall lengths
- Available in single or double flight (RSA Series)
- Custom auger solutions are available

## BULLET SERIES

Bullet Series Augers are specialized at cutting through tough cobble, boulders, fractured, or solid rock. The advanced, rock-crushing boring head design utilizes C1HD Plus™ bullet teeth arranged at optimal cutting angles.

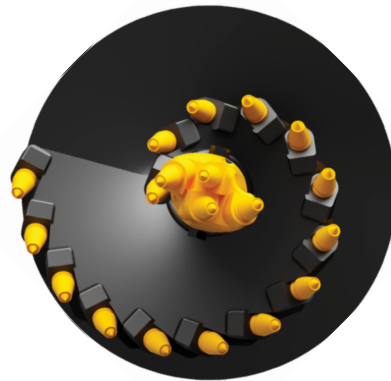

- Outfitted with C1HD Plus™ bullet teeth
- Convenient wear indicator strips on boring head\*
- Reinforced 3/4-in bottom flight\*
- Options from 4.5-in to 36-in overall diameter
- Custom auger solutions are available

## SPIRAL SERIES

Spiral Series Augers will increase your productivity when you face hard ground. Its earth-grinding conical design and aggressive arrangement of C1HD Plus™ bullet teeth will pulverize concrete, fracturable, and solid rock.

- Ultra-performance, hand-laid boring head
- Continuous Stoody 121-G hardfacing
- Continuous 5/8-in thick flighting
- Options from 9-in to 36-in overall diameter
- Custom auger solutions are available

## SPECIALTY

**Belltec Puff Augers** - Belltec Puff Augers are specially designed to bore holes into hard ground for installing T-posts. Belltec Puff Augers feature a 1-5/8-inch solid steel shaft and a replaceable 2-inch carbide cutting head that efficiently cuts through hard dirt and rock.

**Tree and Shrub Augers** - A variant of DCA-Series Augers, Belltec Tree and Shrub Augers are a cost-effective solution for mechanically digging holes to plant trees or shrubs. Options are available from 18-inch to 48-inch diameter.

**Custom Auger Solutions** - For custom auger designs, call 1-800-242-9410 or email [sales@belltec.net](mailto:sales@belltec.net) to contact a Belltec sales representative.
