# BALE WRAPPERS

**Z577** The Diamond self-loading bale wrapper from Metal-Fach is an efficient, economical wrapper designed for farmers wrapping fewer than 400 (4'x4') bales a year. Cable control for lift, rotate and tip are mounted on the tractor. A programmable monitor indicates the number of current wraps when working, the quantity of bales wrapped, and the average number of bales per hour. 20" film may also be used with a minor adjustment.

The mechanical cut-n-hold is a simple effective device that cuts and holds the film when the bale is fully wrapped.

**CUT-N-HOLD** Simple and effective mechanical cut-n-hold requires no separate action from the operator.

**Film Dispenser**

**Hydraulic Controls**

**PROGRAMMABLE COUNTER:** Displays the current wrap, time of operation, number of bales, and average number of bales per hour

Bale Size	4' x 4'
Maximum Bale Weight	1800 lbs.
Width of Film	30"
Minimum Horse Power	45 HP
Length	13.6 feet
Width	8 feet
Height	8.5 feet
Weight	2,100

*The right side wheel swivels out for more stability when wrapping and swings in for narrow transport.*

# BALE WRAPPERS

**Z560** The Diamond Z560 3-point mounted machine is also an economical solution for farmers wrapping fewer than 400 bales a year. Maximum bale diameter is 4'x4' and maximum bale weight is 1,800 lbs. The bale is unloaded by raising the table with the 3 point lift. Film is cut with a simple and effective cut and hold feature. A monitor indicates the number of current wraps when working. 20" film may also be used with a minor adjustment. Wrapping time per bale is approximately 80 seconds with 30" film. An optional off load ramp with end tip is available. The machine is designed to operate in a stationary position with the table resting on the ground.

CAT II 3 Point Hitch - Minimum tractor of 45 HP is required to lift the machine alone.

## OPTIONAL OFF LOAD RAMP

Shown with optional off load ramp with end tip.

## CUT-N-HOLD

Simple & effective

## ROTARY TABLE

Two rollers for stability & guidance and embossing on the wrapping drums to prevent bales from slipping.

Bale Size	4' x 4'
Maximum Bale Weight	1800 lbs.
Width of Film	30"
Minimum Horse Power	45 HP
Length	8.5 feet
Width	4 feet
Height	5.6 feet
Weight	950 lbs.

## COUNTER DISPLAY

Displays the number of wraps per bale.

## Z560 USER REVIEW

*"We chose the Diamond over other models because the Diamond did not require the operator to manually tie plastic, count wraps, and manually cut the plastic. Works very well with minimum base tractor to operate it.*

*We have noticed a marked improvement in herd health and calving success by feeding better quality silage hay especially during calving. It also gives us the ability to make an earlier first cutting and pickup an extra end of season cutting, increasing our over-all yield. It's simple to operate and no adjusting needed once plastic is loaded."*
