Pull Type Snowblowers - Performance Series

**NEW
PRODUCT**

MK Martin has completely redesigned the Pull Type Tractor Snowblower. Most notably with the redesign, the new Pull Type blower now cleans tight to the garage door, with no need for an additional back drag system. Connecting to your tractor's 3PH, the inverted snowblower allows you to drive straight forward pulling the blower instead of backing into the snow. Easier on your neck, the pull type blower is ideal for quickly clearing driveways and laneways.

TIVAR WEAR PARTS

Tivar is a wear resistant plastic that replaces steel cutting edges and bolts onto the skid shoes.

Optional on Pull Type models, the tivar is gentler when clearing, ideal for interlocking brick and decorative stone.

Self Powered Snow Throwers

FEATURES

For tractors and compact skid loaders without hydraulic remotes, MK Martin offers our self powered snow thrower.

While being easy to attach with no drive lines or hoses to worry about, the engine belt drives the shaft which transfers power to the rotor by a roller chain.

These self powered snow throwers are ideal for moving snow quickly with precision in mind. The flared body opening helps to cut snow and direct to the efficient rotor assembly.

STACK N FOLD
TOOLBAR

*Stack and Fold Toolbar shown on SCIC1700 with optional weight box and 12 Row Strip Cat

The Stack N Fold Toolbar from MK Martin is designed to provide safe and easy transport of Strip Cat strip till systems. By stacking both end sections over the center section, the Stack N Fold Toolbar quickly reduces the overall width providing easier transport from field to field. The over centre design and locking pins ensure that the end sections remain securely in place during travel and when in storage.

Stack N Fold Toolbars can be configured with 2 to 4 remotes allowing you to control each side of the toolbar separately. This allows for easier service and maintenance, as well as for custom operations when you may not need the full width of the Strip Cat such as on headlands and point rows.

FEATURES

- Available from 8-Row to 18-Row
- Allows for parallel horizontal stacking of row units
- Ideal for transport and storage
- Equipped with 2 large cylinders (5x30 fold cyl.)
- Equipped with 2 small cylinders (2x4)
- Requires 2 to 4 remotes depending on configuration
