PLASTIC AUGERS

GRAVITY BOX AUGERS

Market Farm Equipment HOW TO CHOOSE AN AUGER

Market Farm Equipment offers a complete range of plastic tube augers for every application. Plastic is ideal for augering corrosive materials such as salt, waste, or fertilizer. Plastic is an oil by-product which has a natural lubricant, meaning less friction and better flow. From ice cubes to silver nitrate, our limitation is your imagination.

Different styles of flighting are available for most auger models. Each style is designed to provide maximum performance and efficiency for specific applications.

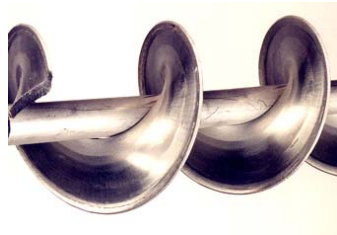

STRAIGHT BLADE PLASTIC FLIGHTING was originally designed for handling fertilizer and other corrosive material.

Ideal for handling fertilizer, can be used for wheat and some types of seed and grains.

Individual plastic modules are mounted on stainless steel center hex shaft.

5 5/8" diameter on 6" augers, 7 5/8" diameter on 8" augers.

CUPPED STEEL FLIGHTING is made of 12 ga. material on 1" schedule 40 pipe. Economical choice for general use. Standard on all augers with steel flighting.

Ideal for use with both seed and fertilizer, (only mild steel and will rust over time) cupped design works well for some seed varieties but not all.

5 5/8" diameter on 6" augers, 7 5/8" diameter on 8" augers

CUPPED PLASTIC FLIGHTING has galvanized shaft with 5" diameter in a 6" auger allows the seed to be augered with less pinching along the inner wall of the auger. Seed cleans out well between varieties. Not available in truck augers.

Ideal for handling seeds (best germination rate compared to conveyor), because it's plastic it can also handle fertilizer.

7" diameter on 8" augers

Market Farm Equipment offers a full range of augers for nearly every application and will custom build for special applications.

Other Market Farm Equipment products include Lawn & Garden and ATV dump carts.

PLASTIC AUGERS

GRAVITY BOX AUGERS

AUGERS - 6" ULTRA GLIDE GRAVITY BOX

ITEMNUMBER	DESCRIPTION	PRICE
953	6"x12'-Complete-PLASTIC Flighting	\$4,301.00
1244	6"x12'-Complete-5" CUPPED PLASTIC Flighting-Galvanized Shaft	\$4,127.00

1456	6"x15'-Complete-CUPPED STEEL Flighting	\$4,427.00

NOTE: Please Specify If Ordering For A Straight Sided Gravity Box

Ultra Glide MARKET AUGERS are constructed out of a heavy gauge PVC tubing and features a plastic polyethylene hopper mounted close to the gravity box door making it easy to clean out. Four flighting options are available: straight blade plastic, cupped plastic & cupped steel.

The auger is swung from side to side and the auger spout remains pointing downward, allowing for proper flow with less chance of plugging. Its unique hopper design mounts beneath the hopper for a better clean out.

The Ultra Glide Auger is available in 6" & 8" diameters and 12', 14', & 15' (6"only) lengths and fits up to 38.5" wide doors. Optional 60" hopper available for larger door openings.

Options include: 3 stage telescopic downspouts, 60" hopper for larger door openings, electric on/off control kits, hydraulic power units and mounting kits for straight door sided gravity boxes.

Ultra Glide Hopper

Threaded Clean-Out

Straight Side Kit

AUGERS - 8" ULTRA GLIDE GRAVITY BOX

959	16 Row Narrow John Deere	\$11,073.00
169	12' Vertical Auger To Fill Crossauger-Single Frame Planters Only	\$3,619.00

- Available in 6" diameter for most 4, 6, 8, 12 and 16 row corn planters. (wide and narrow)
- Plastic fighting augers fertilizer quietly and allows for easy cleaning. Simply auger water to clean out.
- Auger includes 6 cubic inch motor c/w shut-off valve and all necessary mounting brackets. (LESS HYD HOSES)
- Includes plastic hopper w/cover, safety grille, end bearing assy. and drops w/slides (1 less than number of drops)
- Unless special ordered, tubing must be cut for proper drop location when assembling.
- Conversion kits for old rusted out steel Cross augers such as Kasco, John Deere or Kinze are also available. (Our conversion kit changes the existing style of your auger over to a Market cross auger. Some modifications to the fighting and posts may be necessary.)
- Vertical augers are also available to fill the cross augers. Standard length is 12'. A 14' auger is available for planters with fertilizer hopper extensions.
- Seed fill augers can be added to maximize your filling time

When ordering specify planter make, model, style, and row spacing.

(8" and custom cross augers available-call for pricing)

PLASTIC AUGERS

SEED FILL AUGERS

ITEMNUMBER	DESCRIPTION	PRICE
1231	6"x15'-Complete 5" CUPPED PLASTIC Flighting-Galvanized Shaft -Fits JD1590	\$4,112.00
863	6"x15'-Complete-STEEL Flighting	\$4,200.00

Market Single Auger Seed-Fill is designed to store within the transport width of the seed drill or planter & swing out behind to fill. The auger remains stationary while the telescoping downspout allows easy reach to the ends of the drill. The plastic hopper can be rotated to empty.

- Stores across rear of drill or for transport.
- Available for most 15' and 20' no-till/minimum-till drills.
- Heavy gauge PVC plastic tube flighting moves seed quickly, yet gently.
- Optional cupped steel and plastic flighting. Ideal for multiple seed users.
- 6 cubic inch motor c/w shut-off valve.(LESS HYD HOSES)
- Standard auger is 15' long. (actual length of flighting)
