Offset Tilt Grader Blades

Offset Tilt Grader Blades

Available in 5, 6, and 7 foot widths, this versatile grader blade is designed for tractors equipped with Cat 1 3PH. This grader blade features offset, tilt, and angle adjustments each with 5 positions allowing it to tackle any job you can throw at it. The blade is also able to reverse 180° allowing you to grade your property while backing up for even more options. No matter your job, these blades will make the grade.

Features

- Angle Manual Adjustment
- Offset Manual Adjustment
- Tilt Manual Adjustment
- 180° Reversible
- Bolt-On Cutting Edge
- Park Stand

Angling

The angle adjustment on the grader blade allows operators to either increase or decrease the amount of material being deflected providing optimal flow for your conditions.

Tilting

The 5 position tilt is ideal for maintaining crown on lane ways and for managing grade throughout the yard.

Offset

This grader blade features 5 offset positions. When paired with the different angling positions, it allows for even more coverage and versatility.

Reversible

The grader blade is fully reversible.

Cutting Edge

The replaceable cutting edge is also reversible, doubling its life.
