ID200 Trailer Model

ID200 Trailer Model

This versatile trailer model allows you the flexibility to drive post hooked up to a tractor or to a tow vehicle.

Features and Benefits

- Powerful 14hp commercial Kohler engine with direct mounted hydraulic pump.

- Easy operation from the joystick control.

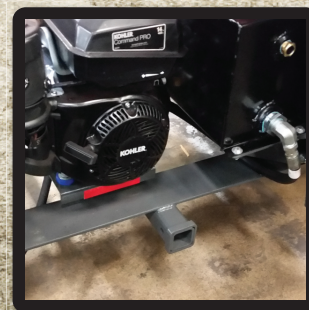

- Hydraulic post hugger with multiple post size adjustments.

- Ability to adjust the hitch and mast with 16" of travel to ensure accurate post placement.

- Drives up to a 12" diameter post up to a height of 12'.

- 750 lb. hammer ensures you can drive a post in any soil condition.

- Built in safety features (hitch lock, forward/back tilt safety chain, Left/Right tilt with stop and mast skirting)

- Ability to adjust hammer height to accommodate different post lengths.

- 67" mast stroke.

- Greaseless poly slides.

- No springs means less down time for maintenance.

- Multiple hitch options including the standard droppin, ball coupler and pintle ring.

Optional rear receiver hitch model ID210
