INDIVIDUAL WRAPPER

Round Bale Wrappers

ITEMNUMBER	DESCRIPTION	WEIGHT	PRICE
TL1000R	Individual Round Bale Wrapper 3PH - Twin Wrap Kit With 4" Offset Standard Equipment	1400	\$11,155.00
TL1100RA	Individual Round Bale Wrapper 3PH - Auto Cycling	1450	\$24,422.00
TL1100RAP	Individual Round Bale Wrapper 3PH - Auto Cycling, Includes Power Pack	1550	\$30,708.00

The **TL1000R** is an efficient choice for farmers looking to wrap individual round bales.

Capable of wrapping bales up to 5' x 5'6", the TL1000R uses auxiliary hydraulics to spin the table and wrap the bale. Twin wrap kit with 4" offset is standard. Once the bale has the desired amount of wrap, simply lift the 3 point hitch to unload the bale.

TL1000R Specifications

Bale Size	4'x4' to 5'x5'6"
HP Required	30HP
Three Point Hitch	Category II
Drive Type	Hydraulic
Bale Guides	Adjustable - 4' or 5"

Twin Wrap (Offset) Uses 2 rolls of 30" film

Wrap Counter: Sets desired number of rotations of wrap per bale/displays current rotation.

Adjustable Bale Guides: Allows 4' or 5' bales to be centered on the turntable.

Manual Transport Lock: Secures bale platform to prevent dumping during transport.

3 Point Hitch Lift: Easily unloads wrapped bales.

TL1100R Automatic Individual Bale Wrapper

This automatic bale wrapper is easy to use and runs while mounted on the 3PH, connected to the tractor's hydraulics or as a standalone unit when equipped with an optional hydraulic power pack.

Standard with twin wrap kit. All functions of the TL1100R can be controlled from the wireless remote providing true one person operation.

SPECIFICATIONS

Bales Size	Up to 5' x 6'
Film Width	30" (x2)
Min. Hydraulic Flow	5 GPM @ 2500 PSI
Hitch	3PH (Category II)
Drive Type	Hydraulic
Bale Guides	Adjustable (4' or 5')
Offset Twin Wrap	Fixed 4"
Length	118"
Width	79"
Height	88"
Weight	1,550*
Power Pack	Optional

WIRELESS REMOTE

The wireless remote can run all functions of the TL1100R

LCD DISPLAY

An easy-to-read fully automatic display provides real time information & is easy to read in direct sun light

HYDRAULIC BALE DUMP

Wrapped bales are hydraulically dumped off the table at the end of the automatic cycle.

OTHER STANDARD FEATURES

- Hydraulically Powered
- Flow Control Regulated Table Rotation
- Mechanical Table Rotate Lock
- Adjustable Wrap Carrier
- Transport Lock
- Wrap Cutter

*Includes optional power pack

45478	Auto Wrap W/Remote - For TL1700SR (For Use W/Tractor Hydraulics)		\$10,979.00
47494	Cooling System		\$1,431.00

TL1700SR Square/Round Bale Wrapper

The TL1700SR is ideal for small to medium sized operations. Hydraulically powered, the TL1700SR can easily switch between round and square bales by moving the secondary drive shaft on either of the appropriate stub shaft. Each stub shaft changes the drive ratio to provide the appropriate advancement of the bale. When the carrier arm is placed in the wrapping position, the carrier can be raised or lowered centering the wrap on the bale to provide even plastic coverage.

- Bale Size:** Square – 3' x 3' up to 7'
Round – 4' x 4' to 5' x 5'6"
- HP:** 30HP
- Hitch:** Trailer (Clevis)
- Drive Type:** Hydraulic
- Guide Roller:** 2

Optional Power Pack

Drive Selection: allows the wrapper to switch between round and square bales

Bale Bumper: Ensures the bale lands far enough away from the table to rotate.

Twin Wrap: Offset with 4" Lead

TL360 Individual Bale Wrapper

The TL360 utilizes the ECV control system for fully automatic cycling and precision wrapping of individual round bales.

BALE CAPACITY

Individual Wrapping – 4' x 4' to 5' x 5'6"

STANDARD FEATURES

- Safety switches on doors
- Shut off switch on the machine
- Electronic control valves
- Fully automatic cycling
- Precision wrapping
- Two 30" pre-tensioners
- Soft start (Hoop)
- High-pressure filter
- Automatic Cut/Hold
- Bale counter – lifetime count with ability to be resettable
- Self-diagnostic controls
- 12 button individual function controls
- In-cab full function control
- Easy to read display with RAM mount
- Plugs into 12-volt power outlet

MACHINE SPECIFICATIONS

- Computer-controlled
- Wireless film sensor
- Film Width 30" (x2) 55% stretch
- HP Required 60 HP
- Minimum 16 GPM required
- Hitch Trailer (Clevis)
- Drive Type - Hydraulic

BALE WRAPPERS

TL SERIES INLINE WRAPPERS

All wrappers require ONE HOUR of additional setup after delivery to dealership.

Based off of Tubeline's seasoned operating platforms, the TL Series Wrappers are available in the analogue LSV or the digital ECV.

The TL Series has 100% more shielding over their predecessors increasing safety while providing a sleek modern look and a reengineered door.

SPECIFICATIONS

- 13 HP Honda Engine
- Electric Start
- Self-contained Hydraulics
- 11L x 15 8 Ply or 27 x 10.5 Traction
- Quick Start Deck
- Up to 129 Bales/Hour

SILVER PACKAGE

- Wireless Plastic Sensor Shutdown Kit
- Remote Steer/Shut Down
- LED Work Lights
- Bale Dispatch (side mounted arm)

GOLD PACKAGE

- Wireless Plastic Sensor Shutdown Kit
- Remote Steer/Shut Down & remote start
- LED Work Lights
- Bale Dispatch (side mounted arm)
- 20 HP Engine With High Flow Hydraulics

PLATINUM PACKAGE

- Wireless Plastic Sensor Shutdown Kit
- Remote Steer/Shut Down (incl. remote start)
- LED Work Lights
- Offset Twin Wrap Kit
- Bale Dispatch (side mount arm)
- 20 HP Engine With High Flow Hydraulics
- Dual Power Drive
- Laser Guidance System

LSV Series

Standard electric over hydraulic controls. LSV series controls Combine analogue switches and hydraulic levers.

The LSV control panel comes standard with a lifetime bale counter.

Optional equipment can be controlled through the toggle switches on the bottom of the control panel.

Hydraulic levers control the table and optional power drive systems.

ECV Series

Electric over hydraulic controls with an easy to use digital console which provides the brains behind our precision wrapping.

The digital control panel allows you to select functions, and configure settings at the touch of a button.

The multi-function joystick provides centralized control over steering and our optional power drive.

Large rocker switches are provided for primary features like power, emergency stop, & optional features like remote start & night lights.

CUT YOUR WRAP IN A SNAP!

NOW STANDARD ON ALL AX2 & ECV INLINE WRAPPERS

Push and hold the Film Snap button located beside the operator's panel until both tensioners pass, triggering each Film Snap bar. The Film Snap bar cuts the wrap quickly and easily.

TL5000 Wrapper Features

- Film Snap (quick cut of plastic wrap)
- Fully automatic cycling
- Electric start
- Spark arrester on engine
- Low oil alert on engine
- Road light c/w reflector
- Temperature gauge on hydraulic tank
- Lock pin on hoop to reload plastic
- Hydraulic steering
- Electric hydraulic switch in control panel
- Main control panel wired for field installed options
- Adjustable stroke length on charge table
- 2 - 30" pre-tensioners
- Adjustable tongue
- Automatically idles down when cycle completed
- Safety shut off switch on guards
- Plastic sensor shutdown Optional
- Twin wrap kit (for double plastic) Optional

TUBE-LINE™

BALE WRAPPERS OPTIONAL EQUIPMENT

OPTIONS:

Night Working Lights

Remote Steering & Shutdown

Hydraulic Power Drive

Guide Rollers

Plastic Sensor Shutdown

Quick Start Power Jack

SAFETY FEATURES:

Panic Stop Button

Limit switches on Safety Cages prevent operation when changing plastic.

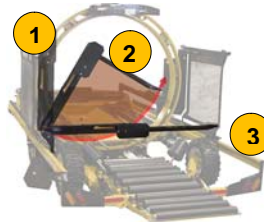

Hoop Lock Pin prevents hoop rotation and hoop drift when changing plastic.

Optional on TLR5000 AX2 & ECV models only

Mounted to the side of the wrapper the spring assisted Bale Dispatch lowers across the tail to form a solid push bar. Once deployed one cycle of the ram is enough to push the bale from the tail of the wrapper.

1. Storage & Wrapping position.
2. Easily folds out and retracts using the integrated handle.
3. When extended, the Bale Dispatch rests in a pocket which provides a firm backstop when pushing in bales.

Optional on all 5000 & 5500 models (Standard on 6500)

Multiple layers of wrap protect your bales from unwanted holes and also bond to form stronger less penetrable wrap once applied.

Tubeline's twin wrap kit holds two rolls of film and passes them through a single stretcher activating the wraps bonding compound forming a stronger 2-Ply layer of film & folds them over helping to prevent piercing of the wrap.

Combining two sets of two rolls for a total of four, The twin wrap kit provides the same protection as four separate stretchers with the additional benefit of producing a more durable bonded 2-Ply film that stands up better than single ply layers.
